EN

Freestanding bathtubs are the latest trend in a modern or classic bathroom. The concept of free standing is defined by the placement of the bathtub which is not necessarily attached to a wall or doesn't require a frame support. This concept gives you more freedom in the bathroom design, the bathtubs in this range can be placed even outside the environment of a bathroom. Simple, spacious, with a minimalist design, the new freestanding bathtubs are a safe choice, suitable to any environmental style. The freestanding bathtubs benefit from the high quality specific to all Fibrex products, but in the same time, it offers a very practical alternative to the classic bathtubs.

RO

Căzile de baie freestanding reprezintă cea mai recentă tendință într-o baie modernă sau clasică. Conceptul free standing sau cada de baie de sine stătătoare este definit de fixarea căzii care nu este atașată neapărat la un perete sau nu are nevoie de un cadru de susținere. Acest concept îți oferă mai multă libertate în amenajarea băii, căzile de baie din această gamă putând fi amplasate chiar și în afara ambientului unei băi. Simple, spațioase, cu design minimalist, căzile din noua gamă freestanding sunt o alegere sigură, potrivită oricărui stil ambiental. Căzile freestanding beneficiază de calitatea superioară specifică tuturor produselor Fibrex, dar oferă în același timp o alternativă foarte practică la căzile clasice.
